

Town and Country Veterinary Clinic

Pet's Name _____

Like you, our greatest concern is the well being of your pet. We will perform a physical examination before administering anesthesia; however, many vital body systems are undetectable without screening blood tests. These tests are especially important before any surgery. Our in-house laboratory is fully equipped to perform these important tests before your pet's procedure.

Pre-Anesthetic Blood work

Accept Decline

Recommended for healthy pets of all ages.

Tests include Complete Blood Count,
Heart, Kidney, and Liver functions.

Cost to you is \$78.50.

DOG- Heartworm, Lymes, Ehrlichia, Anaplasmosis – \$45.00

CAT – Heartworm, Feline Aids, Feline Leukemia - \$55.00

Pain Management

In order to provide a greater level of comfort, I would like my pet to receive pre and post-surgical medication for pain relief.

Cost to you is \$15.00 Feline \$20.00 Canine

Microchip

While not mandatory with the increase of lost pets we recommend every pet gets micro-chipped in order to quickly return pets to their loving families. \$65.00

I understand that during any procedure, unforeseen circumstances may arise that necessitate an extension or additional procedure be performed. I hereby authorize performance of such procedures as deemed necessary in the judgment of the risks as part of the procedure. I also understand that there are no guarantees given or implied. I have read and understand this consent.

Please note: Pet's entering our clinic with external parasites will be treated for parasites at the owners expense.

Please indicate choice of payment for these procedures. Cash Check Credit Card
